

Secondary Maths Subject Leader Development Network

This Development network is a well established group who meet for 3 days over the course of an academic year. Whilst the days form part of an ongoing programme they are also stand-alone sessions, enabling schools to choose to send a different member of their department each time if they wish.

Following the rhythm of the academic year:

- The Autumn meeting has an emphasis on new developments, what local and national outcomes data can tell us about supporting our learners effectively
- The Spring meeting has a strong teaching and learning focus including strategies to support learners as they prepare for summer examinations.
- The Summer meeting includes a leadership focus on current impact, effectiveness of implementation and development planning for the coming year.

The Network Participants will:

- learn about new developments locally and nationally
- have the opportunity to collaborate and identify best practice with colleagues from other schools.
- hear from experts from across the sector such as exam boards, CPD providers and centres of mathematical research.
- learn about the professional development opportunities that are available

Dates

9am (for 9.15 start) - 3:30pm,

Monday 11th October 2021

Monday 28th February 2022

Monday 4th July 2022

Venue Address

L.E.A.D Teaching School Hub
Unit 1 & 3 Regatta House
Henley Way
Lincoln
LN6 3QR

Comments from previous participants

"A one stop shop for everything I needed to be thinking about."

"As a head of department new to the area, this was invaluable in understanding the context of the area and the support that is available."

"I've gained so many ideas and strategies through the opportunity to talk with other maths leaders about the key things affecting all of us."

**£99 for
3 sessions**
